

Laying Guide – 4 Mixed Size

900x600, 600x600, 600x290 & 290x290

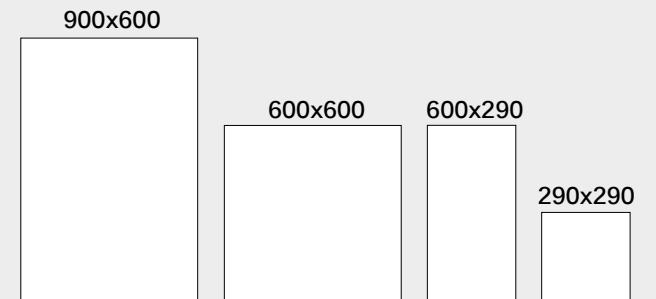

This guide is just for illustration purposes only.

Your paving should be installed following the “full bed method” where the whole slab is supported and in full contact with the mortar bed.

Our coverage is based on a 10mm gap.

If laying from multiple packs, we recommend that you select paving from each pack to blend the colours.
